Subject: RE: Uranium Mining!!!

Thank you for emailing me your comments on the draft UIC Dewey-Burdock permitting actions. I have added your email to the list of public comments received. I have also added you to my contact list to keep you informed on future EPA activities related to these proposed actions.

Thank you!

Valois

Subject: Uranium Mining!!!

Hello my name is Ex. 6 Personal Privacy (PP) am writing you today because of concern about mining of uranium in the Black Hills.

I see many issues with this mining project:

1. Its uses a lot of water. 551 gallons per minute, totaling 94 billion gallons of water during a 20 year period. That uses up all of the resources of the people who actually live and love this place. The long term effect of water availability cause a drought and forcing people to buy their water from the else where, and cause a drought.

2. Uranium affects humans and animals on cellar level. Meaning it breaks down your whole body an organs. People over profit!!!

3. Short term profit with long term pollution, and unemployment.

4. Uranium mining has already leaked in these ares causing damage to the land, waters, and polluting the aquifers. Don't you want a place where you can eat the plants right from the ground and have water you can swim in?

5. Weather phenomena such as tornados spread Uranium, and radiation. Which is also causing cancer all around your area and starting to see the effect the radiation has on people.
